Theme Styles

Themes determine the overall appearance of certain elements of your project, namely the navigation bars, default page content, and end screens.

Branding

Here you can set your theme colors or pick from the list of preset options, and indicate if a logo and a fav icon are required.

Note: Theme colors are available to style elements and components throughout your projects as you see fit. However, they are also used for certain player elements. Rollover each color for more information.

When creating Variants of themes it's best to be consistent with what kind of color gets applied to each spot (e.g., red to red, blue to blue). Creating dramatic theme color differences could possibly create unwanted effects when repurposing/rethemeing content.

dominKnow|:::

Select a Preset

Don't have branding styles? No problem! To make things simple we have a list of preset options for you to choose from.

Default	Blue Hero	Lime
Journal	Night Time	Dramatic
Flatly	Ubuntu	
Readable	Clean	

Theme Colors

R:51 G:122 B:183	R:92 G:184 B:92	R:91 G:192 B:222	R:240 G:173 B:78	R:217 G:83 B:79
#337ab7	#5cb85c	#5bc0de	#f0ad4e	#d9534f

Logo

A logo can appear on the top navigation bar. If you would like your company logo to appear, please provide an image of 100px by 50px.

Yes   No

Fav Icon

A Fav Icon *(Short for favorite icon)* appears at the top of the internet browser on the browser tab.
If you wish to add your own icon, please provide one that is 16px by 16px.

Yes   No

Colors

Here you can add a background color and/or a background image, set the default text color, the color of text with links applied, and set the value for the starting point of your gray scale.

Background

Aa

R:255 G:255 B:255
#ffffff

Text

Set the default color for the text.
Note: In authoring, you will be able to add emphasis colors and inline styling to change the color of text elements.

R:38 G:51 B:51
#262424

Links

Links are hyperlinks, you can add a link to view a glossary term, a file or jump to a URL.

Default Color:
R:51 G:122 B:185
#337ab7

Visited Color:
R:51 G:122 B:185
#337ab7

Gray Scale

Input a value for the starting point (darkest color) of your gray scale.

R:0 G:0 B:0
#000000

dominKnow|:::
connect the thoughts

Typography

The Base Font Size (pixels is the preferred unit of measure) will be used as your body text size. All other text types will size up or down accordingly from the base font size.

Note: Not all browsers support all font files. Keep this in mind when choosing a file to upload. You may wish to review w3schools article, CSS3 Web Fonts to learn more about which browsers support which file types.

Supported file types for upload: OFT, TTF, EOT, WOFF, WOFF2

Web Safe Font Combinations

Besides the base font you can include additional fonts to your theme.

Scale: Use this feature to scale Title and Header fonts on mobile devices.

Font Family

Base Font Size (px)

Backgrounds

Often times you may wish to use different page background colors or images for demarcation purposes throughout your learning. You can predetermine up to four of these special page background colors or images.

For each page type you can set the background color and/or upload an image and set text color for the page.

Buttons

dominKnow | ONE offers a wide variety of ready-built buttons with commonly used actions (buttons that show things, buttons that animate things, buttons that play media etc.) to help you create your content fast and effective.

The system creates a set of default buttons, but you can also set the colors for up to seven custom buttons.

No Navigation Player

Designed for:

The No Navigation theme allows your content to stand alone, unencumbered by navigation bars or menus. This theme is built using the Vertical Player experience.

Create your content in one continuous page of information, or insert your own buttons or actions to guide your learner from page to page.

This theme supports Right to Left text as the author controls all navigation.

Knowledge Base Player

Designed for:

The Knowledge Base Player Experience is great for an informal learning aid/knowledge base/performance support tool. There are no forward and back buttons, because this content is published as a website rather than a SCORM course. Learners use the Search field to locate the information they need to help them carry out the task they need to complete, or they can navigate through the menu to find information they might not know about. At narrow screen widths the menu collapses to make maximum use of the available space for the articles (the Menu can still be opened using the Menu button at any time).

Note: The hero backgrounds are set from the course properties in the authoring platform.

Tutorial Player

Designed for:

The Tutorial Player is ideal for delivering small topic-driven forms of content.

Projects with multiple learning objects will open with a home page. The home page offers a bulletin board-style visualization where each learning object is represented by a card on the board. Each card displays the learning object's hero image, title and description along with the predicted completion time and View button which allows the user to jump directly to the topic. The navigation bar appears to the left of the content and displays a menu icon, close button and learning object title with its numbered pages listed vertically below. Page navigation appears at the bottom of each page.

Note: This player doesn't allow for player customizations only theme styles.
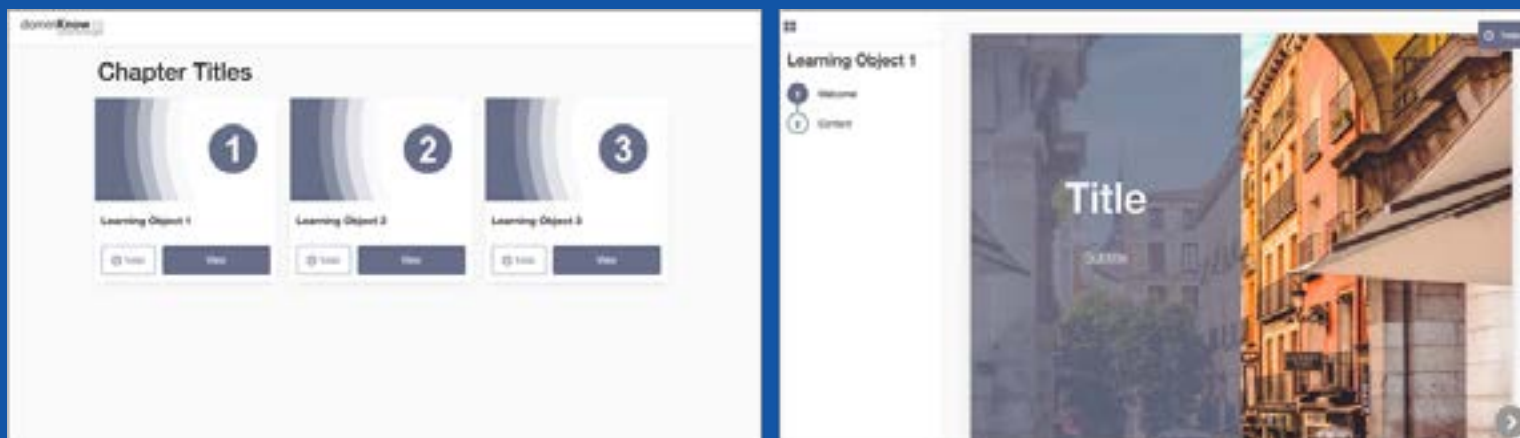

Nova Player

Designed for:

The Nova theme uses traditional eLearning presentation with top and bottom navigation bars. This theme is great for managing higher resolution projects and is the ideal choice for projects created from a PowerPoint import.

The top bar displays your logo followed by the project and page title, Transcript and Menu buttons.

The bottom bar displays the Forward and Back navigation buttons and the page counter. When narration is present on a page, the audio progress bar also appears. When a project is viewed in landscape on a smaller device, the bottom bar is removed and the Forward and Back buttons are repositioned to the right side of the page.

ILT Player

Designed for:

The ILT theme is built using the Instructor Led Training player experience which optimizes your project into a projector-friendly format.

The ILT theme will expand and retract all content to accommodate any window size. This theme has no navigation bars and relies on the use of keyboard navigation. Up and Down arrow keys will move you from page to page while the Left and Right arrow keys will navigate you through any time-based actions within the page.

Note: when you open the published project it will open a second browser window to show the Page Notes for each page, so you can include "speaker notes" just like standard slide decks. (You'll need to allow pop ups for this to work.)
