
Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

Created On: January 18, 2023

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

1. Select the **Question** tab.

The screenshot displays the Articulate Storyline software interface. The top ribbon includes tabs for 'New', 'Open', 'Edit', 'Library', 'Insights', 'Publish', and 'Preview'. The 'Question' tab is selected and highlighted with a red box. Below the ribbon, the 'Properties' and 'Delete' buttons are visible. The main workspace shows a slide titled 'Drag and Drop' with a question: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct category.' The question includes two large rectangular drop zones labeled 'Social Engineering' (dark blue) and 'Malware' (orange). Three draggable items are positioned between the zones: 'Viruses', 'Spyware', and 'Ransomware'. A 'Submit Placeholder' button is located at the bottom right of the workspace. The bottom status bar shows 'Page Notes', 'Page Transcript', 'Element States', 'Timeline', and 'Accessibility' tabs. On the far left, there are icons for 'Contacts', 'Support', and 'Quick Tour'. On the far right, it indicates 'Saved (1 min read)' and provides 'Commit' and 'Save a Copy' buttons.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

2. Select Choices.

The screenshot displays the LMS interface with the 'Question' ribbon selected. The 'Choices' tab is highlighted with a red box. The main content area shows a 'Drag and Drop' question titled 'Drag and Drop Example 3 - Matches and Drop Distractor'. The question text is: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct category.' Below the text are two large colored boxes: a blue box labeled 'Social Engineering' and an orange box labeled 'Malware'. In the center, there are three orange buttons labeled 'Viruses', 'Spyware', and 'Ransomware'. The interface includes a top navigation bar with 'New', 'Open', 'Edit', 'Library', 'Insights', 'Publish', and 'Preview' tabs. The 'Question' ribbon has options like 'Insert', 'Engage', 'Question', 'Comments (0)', 'Authors', 'Review', and 'Share'. The bottom status bar shows 'Saved (1 min read)', 'Commit', and 'Save a Copy' buttons.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

3. The Edit Question Properties panel will open to the right of the Stage.
To set up the first Match, select the **Add** button.

The screenshot displays the Articulate Storyline software interface. The top ribbon includes tabs for New, Open, Edit, Library, Insights, Publish, and Preview. The 'Question' tab is active, showing options for Insert, Engage, and Question. The 'Question' panel on the left includes settings for Edit, Choices, Feedback, Default, and Settings. The main stage area shows a drag and drop question titled 'Drag and Drop' with a subtitle 'Select Submit when you have completed the question.' The question text reads: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct category.' Below the text are two large colored boxes: a blue box labeled 'Social Engineering' and an orange box labeled 'Malware'. In the center, there are three orange buttons labeled 'Viruses', 'Spyware', and 'Ransomware'. The 'Edit Question Properties' panel is open on the right, showing the 'Details' tab. The 'Add Match' section is visible, with 'Drag Item' and 'Drop Target' dropdown menus. The 'Add' button is highlighted with a red box. The bottom of the interface shows a toolbar with icons for Page Notes, Page Transcript, Element States, Timeline, Accessibility, Feedback, Update, and Cancel.

4. Select **Match**.

The screenshot shows the Articulate Storyline software interface. The top ribbon includes tabs for New, Open, Edit, Library, Insights, Publish, and Preview. The 'Question' tab is active, showing options for Edit, Choices, Feedback, and Default. The main canvas displays a drag and drop question titled 'Drag and Drop' with the text: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct'. There are two large blue boxes labeled 'Social Engineering' and 'Malware'. Three orange boxes labeled 'Viruses', 'Spyware', and 'Ransomware' are positioned between them. The 'Edit Question Properties' panel is open on the right, showing the 'Add Match' button highlighted with a red box. The panel also includes a 'Drag Item' dropdown, a 'Drop Target' dropdown, and buttons for 'Remove', 'Match', 'Drag distractor', 'Drop distractor', 'Ok', and 'Cancel'.

5. Select the **Drag Item** selection list.

The screenshot shows the Articulate Storyline software interface. The top ribbon includes tabs for New, Open, Edit, Library, Insights, Publish, and Preview. The 'Question' tab is active, showing options for Edit, Choices, Feedback, and Default. The main canvas displays a 'Drag and Drop' question titled 'Drag and Drop'. The question text reads: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct'. There are two target boxes: 'Social Engineering' (blue) and 'Malware' (orange). Three draggable items are listed in the center: 'Viruses', 'Spyware', and 'Ransomware'. The 'Edit Question Properties' panel is open on the right, showing the 'Add Match' section. The 'Drag Item' dropdown is highlighted with a red box, and the 'Drop Target' dropdown is also set to 'Select'. The 'Add Match' section includes buttons for Remove, Edit, and Add.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

6. Select the **Viruses Text** element.

The screenshot shows the Articulate Storyline software interface. The top ribbon includes tabs for New, Open, Edit, Library, Insights, Publish, and Preview. The 'Question' tab is active, showing options for Edit, Choices, Feedback, and Default. The main canvas displays a 'Drag and Drop' activity titled 'Drag and Drop Example 3 - Matches and Drop Distractor'. The activity includes a 'Select Submit when you have completed the question.' checkbox and a question text: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct'. Below the question are two target areas: 'Social Engineering' (blue) and 'Malware' (orange). Between them are three draggable items: 'Viruses', 'Spyware', and 'Ransomware'. The 'Edit Question Properties' panel is open on the right, showing the 'Add Match' section. In the 'Drop Target' list, 'Malware Target' is selected, and in the 'Drag Item' list, 'Viruses Text' is highlighted with a red box. The bottom of the interface shows a toolbar with icons for Page Notes, Page Transcript, Element States, Timeline, and Accessibility, along with buttons for Feedback, Update, and Cancel.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

7. The Viruses Text element is now bound in red on the Stage to show it was selected. Select the **Drop Target** selection list.

The screenshot shows the Articulate Storyline software interface. The main workspace displays a drag and drop activity titled "Drag and Drop". The activity content includes a instruction "Select Submit when you have completed the question." and a scenario "IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct". There are two target areas: "Social Engineering" (blue box) and "Malware" (orange box). In the center, there are three draggable items: "Viruses" (highlighted in red), "Spyware", and "Ransomware". The "Edit Question Properties" panel is open on the right, showing the "Add Match" section. In this section, "Viruses Text" is selected as the "Drag Item" and "Select" is chosen as the "Drop Target" from a dropdown menu. The interface includes a top ribbon with "New", "Open", "Edit", "Library", "Insights", "Publish", and "Preview" tabs, and a bottom toolbar with "Page Notes", "Page Transcript", "Element States", "Timeline", and "Accessibility" options.

8. Select the **Malware Target** element.

The screenshot shows the Blackboard LMS interface for editing a question. The main canvas displays a question titled "Drag and Drop" with the following content:

Select Submit when you have completed the question.

IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct

Social Engineering

Malware

Viruses

Spyware

Ransomware

The "Edit Question Properties" panel is open on the right, showing the "Add Match" section. The "Drag Item" is set to "Viruses Text". The "Drop Target" is set to "Malware Target", which is highlighted with a red box. The "Social Engineering Target" is also listed as an option.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

9. Select **Ok**.

The screenshot shows the Articulate Storyline software interface. The top ribbon includes tabs for New, Open, Edit, Library, Insights, Publish, and Preview. The 'Question' tab is active, showing options for Edit, Choices, Feedback, and Default. The main canvas displays a drag and drop question titled 'Drag and Drop'. The question text is: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct'. There are two target areas: 'Social Engineering' (blue box) and 'Malware' (orange box). Three draggable items are listed: 'Viruses', 'Spyware', and 'Ransomware'. The 'Edit Question Properties' panel on the right shows the 'Add Match' section where 'Viruses Text' is assigned to the 'Malware Target'. The 'Ok' button is highlighted with a red box.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

10. To set up the second Match, select the **Add** button.

The screenshot shows the Articulate Storyline interface for creating a drag and drop activity. The main canvas displays a 'Drag and Drop' activity with two target areas: 'Social Engineering' (blue) and 'Malware' (orange). Three draggable items are listed in the center: 'Viruses', 'Spyware', and 'Ransomware'. The 'Edit Question Properties' panel on the right shows the 'Matches' tab with a table of draggables and targets. The 'Add' button in the 'Add Match' section is highlighted with a red box.

22. Select the **Malware Target** element.

The screenshot shows the Blackboard LMS interface for creating a custom drag and drop question. The main canvas displays a question titled "Drag and Drop" with the following text:

Select Submit when you have completed the question.

IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct

Below the text are two target areas:

- Social Engineering** (blue box)
- Malware** (orange box)

Between the target areas are three draggable items:

- Viruses
- Spyware
- Ransomware

The right-hand panel, titled "Edit Question Properties", shows the "Matches" tab. It lists the following matches:

Draggable Element	Target
Viruses Text	Malware Target
Spyware Text	Malware Target

Below the matches table is the "Add Match" section, which shows the "Ransomware Text" item being assigned to the "Malware Target".

23. Select **Ok**.

The screenshot shows the Articulate Storyline software interface. The top ribbon includes tabs for New, Open, Edit, Library, Insights, Publish, and Preview. The 'Question' tab is active, showing options for Edit, Choices, Feedback, and Default. The main canvas displays a 'Drag and Drop' question titled 'Drag and Drop Example 3 - Matches and Drop Distractor'. The question text reads: 'IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct'. There are two target areas: 'Social Engineering' (blue) and 'Malware' (orange). Three draggable items are listed: 'Viruses', 'Spyware', and 'Ransomware'. The 'Ransomware' item is currently being matched to the 'Malware' target. The 'Edit Question Properties' panel on the right shows the 'Add Match' section with 'Ransomware Text' selected as the drag item and 'Malware Target' selected as the drop target. The 'Ok' button in the 'Add Match' section is highlighted with a red box.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

24. Now that the three Matches are set up, we can add the Drop Distractor.

Select the **Add** button.

The screenshot shows the Articulate Storyline interface for creating a drag and drop question. The main canvas displays a question about IT security threats, with two target boxes: "Social Engineering" (blue) and "Malware" (orange). Three draggable items are listed in the center: "Viruses", "Spyware", and "Ransomware". The "Edit Question Properties" panel on the right shows a table of matches and a table of distractors. The "Add" button in the "Add Match" section is highlighted with a red box.

Custom Drag and Drop Example 3 - Setting Up Matches and Drop Distractor

30. The draggable elements on the Stage now show a hand icon and the drop target elements show a target icon.

The screenshot displays the Articulate Storyline software interface. The top ribbon includes tabs for 'New', 'Open', 'Edit', 'Library', 'Insights', 'Publish', and 'Preview'. The 'Question' tab is active, showing options for 'Insert', 'Engage', and 'Question'. Below the ribbon, there are icons for 'Edit', 'Choices', 'Feedback', and 'Default'. The main stage area is titled 'Drag and Drop' and contains the following text:

Select Submit when you have completed the question.

IT security threats can typically be categorized as either a Social Engineering or a Malware threat. Sort the threats below into their correct category.

Below the text, there are two large rectangular drop targets. The left target is labeled 'Social Engineering' and is dark blue. The right target is labeled 'Malware' and is orange. Between these targets are three draggable elements, each with a hand icon: 'Viruses', 'Spyware', and 'Ransomware'. The bottom of the interface shows a 'Page Notes' tab, a 'Page Transcript' tab, and a 'Timeline' tab. The bottom right corner has a 'Saved (1 min read)' indicator, a 'Commit' button, and a 'Save a Copy' button.
