
Moving an Element on a Page with a Slider using Page Actions and Timings

Created On: January 13, 2022

1. There are two ways that you can setup the animation, let's take a look at the first way. Select **Interact**.

2. Select **Triggers**.

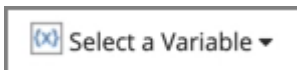

3. Select **Is Changed** under Variables.

4. The Pick a Trigger Popup shows with Variables open.

Select the Select a Variable dropdown.

5. From the list, select **Slider01(number)**.

6. Select **Ok**.

7. Select **Equal to** under Number.

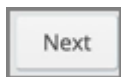

8. Select **Enter Value**.

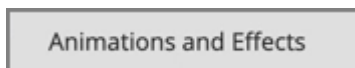

We'll add 1 for you. (For slider position 1)

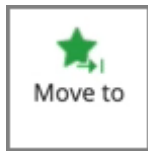

9. Select **Next**.

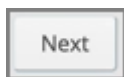

10. Select **Animations and Effects** in the side menu.

11. Select Move to under Motion.

12. Select **Next**.

13. The Page Actions and Timings Panel comes up, to finish setting up the position 1 action select the Artwork element under Targets.

14. Under Coordinates select X input.

We'll add 79 for you. (Or position 1 X value)

15. Select Y input.

We'll add 70 for you. (Or position 1 Y value)

16. Select Apply.

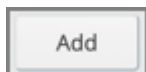

17. Position 1 is now set.

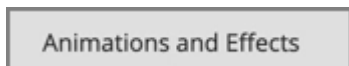

Next, we are going to setup position 2 using the second way to setup an animation.

With the Page Actions and Timings panel open.

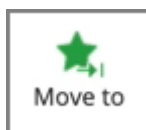

Select Add.

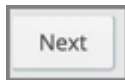

18. Select **Animations and Effects** in the side menu.

19. Select Move to.

20. Select **Next**.

21. The Page Actions and Timings panel shows.

Under Targets select the Artwork element.

22. Under Trigger select the dropdown.

23. Select When Variable is...

24. Under Variable select the dropdown.

25. Select the variable Slider01(number).

26. Operator will stay the same (==).

Select the input for Value, and we'll add 2 for you. (For slider position 2)

27. Under Coordinates select the X input.

We'll add 400 for you. (Or position 2 X value)

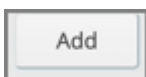

28. Select the Y input.

We'll add 70 for you. (Or position 2 Y value)

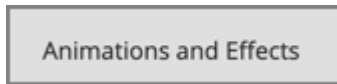

29. Select **Apply**.

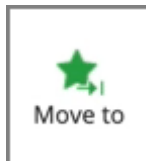

30. Select **Add**, and we'll repeat the steps used above for position 2.

31. Select **Animations and Effects** in the side menu.

32. Select **Move to**.

33. Select **Next**.

34. The Page Actions and Timings panel shows.

Under Targets select the Artwork element.

35. Under Trigger select the dropdown.

36. Select When Variable is...

37. Under Variable select the dropdown.

38. Select the variable Slider01(number).

39. Operator will stay the same (==).

Select the input for Value, and we'll add 3 for you. (For slider position 3)

40. Under Coordinates select the X input.

We'll add 700 for you. (Or position 3 X value)

41. Select the Y input.

We'll add 70 for you. (Or position 3 Y value)

42. Select Apply.

43. Position 3 is now set.
Select **Preview**.

44. The element starts at position 1.

Select the middle of the slider.

A horizontal slider control consisting of a rectangular track with a lighter-colored handle in the center. The track is outlined in black and has a light gray background. The handle is a slightly darker gray and is positioned in the middle of the track.

45. The element moved to position 2.

Select the end of the slider.

46. The element moved to position 3.

Select the Red Circle in the top left corner of the preview window to close it.

47. The element now moves when the slider is moved to positions 1, 2, or 3.
