Build a Section of Your Own by Adding a Row To Your Flow Page

Created On: May 7, 2021
Created with:

1.   On the Add a Section panel below the Stage, select **All** Sections.

2.   The Add to your Page panel opens.

       We want our new section to have an H1 at the top.

       Select H1 Heading.

3.   Select the X to close the Add to your Page panel.

4.   With the new element still selected on the page, select the Section icon in the breadcrumb.

5.   The Section is now highlighted on the page.

        An Add Row button is shown in the upper right corner of the Section on the Stage.

        This option allows you to add more Rows to this Section so you can create your own custom Section layout.
