
Setting On-Page Elements to Language Targets

Created On: August 26, 2024

1. Select the **Image Element**.

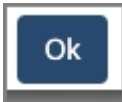

2. Select the **Publish Targets** option (target icon).

3. Select the **Languages** drop down list.

4. Select **Spanish**.

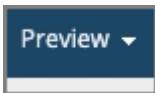

5. Select **Ok**.

6. The Publish Targets option on the Image Element has a dark bubble to indicate that a target has been set. Select away from the Image Element.

7. When the Image Element is not selected, it displays the set target(s).
Select **Preview**.

8. Select **Full Project**.

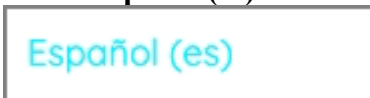

9. When the preview opens it displays the Project's first language text, and doesn't show an image. Select the **Menu**.

10. Select the **Language Indicator**.

11. Select **Espanol (es)**.

12. The Preview switches to display the Spanish translation text as well as the Spanish-targeted image.
