https://www.dominknow.com
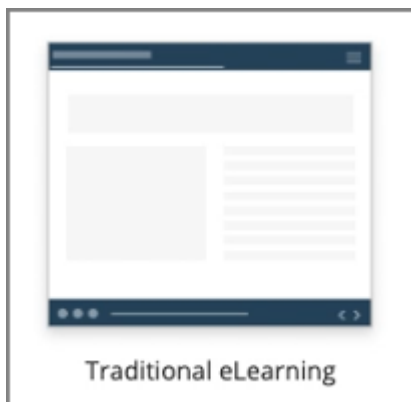

1.　　On the Splash Page, select New Project.

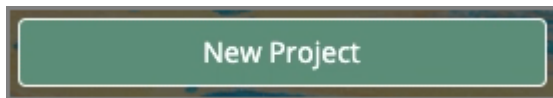

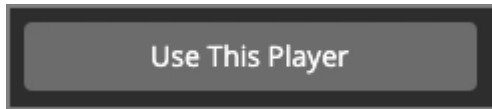

2.　　Select Claro.
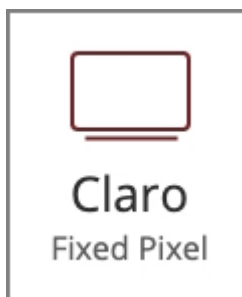

3.　　From the Player Experience options, select Traditional eLearning.

4. On the expanded panel you'll see a description of this Player Experience.
    Select Use This Player.

    Use This Player

5. Change the name of the new Project (it will be named as a "Quickstart" by default.)

    For this example, select the name field and we'll add text for you to rename it as "Protecting IT Security".
    Chris's Quickstart

6. Select a design option to review some of its page designs.

    For this example, select Cube.

    Cube
    Template
    Subtitle

    Cube

7.   You may need to scroll to see the expanded panel.

Select Use This Template Set.

Use This Template Set

8.   The new Project will open and you will see the Title page on the authoring Stage.
