4. Select the Blank Drag and Drop option (12_Drag and Drop).

5.   Select As Practice Question.

As Practice Question

6.   Select the page to modify the layout.

Drag and Drop

Drag the correct answer to the drop target.

Volutpat maecenas volutpat blandit aliquam etiam erat velit. Lobortis mattis aliquam faucibus purus in massa.

Venenatis urna cursus eget nunc scelerisque viverra mauris in aliquam.
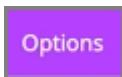

7.   Select Insert.
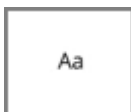

Insert

8.   Select Drop Target.

Drop
Target

9.   Select where on the Page to add the Drop Target.

10.   Select Options.

Options

11.   Style the drop target. Select the last option under Color. This will remove the default fill color.

Aa

12.   Select Pick a Fill to use a custom color.

13.   Select the Third option under the first row.

14.   Resize the drop target so it is big enough to fit the full finished puzzle.

15.   The Drop Target has been reized. Upload all the Jigsaw images to the media browser, and add them to the page. In this case, we created the pieces using Photoshop and imported each individual image (puzzle piece) into Claro then added each puzzle piece to the page. Each puzzle piece needs to be its own element.

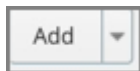

16.   Select Question.
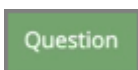

17. Select Choices.

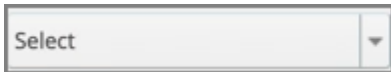

18. Select Add.

19. Select Match.

20. Select the dropdown beside Drag Item.
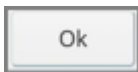

21.   Select 1.

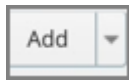

22.   Select the dropdown beside Drop Target.

23.   Select Drop Target.

24.   Select Ok.

25. Select Add. Add Matches for all of the pieces.

Add

26. Select Update.

Update

27. Matches are added. Next, we are going to change some of the question settings to remove feedback and default question buttons. Select Disable Previous.
Disable Previous

28. Select Disable Next.

Disable Next

29. Select Disable Submit.

30. Select Disable try again.

31. Preview the Current Page to see how the Jigsaw Puzzle will look and behave for your learners.
