1. Select the Element on the page you wish to move.

2. Select its Group in the Breadcrumb above the Stage.

3. On the Page Structure to the left of the Stage, you can see that the Tabset Group is below the Body Text Group in the heirarchy of the Row. Select the Up arrow in the Selection Control Bar.

4. The Tabset Group has now been moved up in the order within the Row. You can confirm this by viewing the Pages Structure to the left of the stage.

   The effect on the Stage is that the Tabset Group is now on the left of the Body Text Group.
