1.   Select the **+ Add a Section** button on the black control bar.

2.   The Add to your Page panel opens. Select the **All Sections** button.

3.   Scroll down to the Quizzes section and select the **Hotspot Image** question.

4.   A placeholder is added to the page. Select the **Pick an Image from your Media Library** button

5.   The Media Browser opens. From here you can search for an image or upload one. For this example, select the **Heart image**.

6.   Select the **Insert** button.

7.   The Add Hotspots to Your Image panel will open.

You can add rectangular, circular, or polygonal hotspots.

For this example, select the **Polygonal** hotspot.

8.   Once you have selected a hotspot shape you can add as many hotspots of that shape in a row as you need. When you are finished with that specific shape you can select a different shape or select the cursor option to stop adding hotspots.

For this example, we will add the hotspots for you. Select the **image** to continue.

9.   Select the **Ok** button

10. The image is shown on the stage, with the numbered hotspots.

    Scroll down to the **Label Choices** section.

    You have the option to use Text or Images. By default, Text is selected, we will stick with Text for this example.

    Hotspot areas are assumed to be correct selections, unless you mark them as a Distractor. For this example, they are correct.

    For the first hotspot, select the **Label text entry box** then select the text within that field and type in a label. For this example, we will add it for you.

    Question Hotspot

11. You can now style your text if you would like. We will style it for this example.

    Select the **Text Editor button** in the Label area.

12. The mini formatting tool bar appears with several formatting options.

    For this example, we will apply bold to our text.

    Select the **label text**.

    Right Ventricle

13. The mini formatting tool bar appears with several formatting options.
    For this example, we will apply bold to our text.

    Select the **B icon**.

    B

14. Select the **OK** button.

Ok

15. You can add item level-feedback for any hotspot, including feedback for distractors.

Select the **Feedback text entry box** to add feedback for this selection.

For this example, we will add it for you.

Enter Feedback

16. Scroll down to the **second hotspot** section.

Select the **Label text entry box** to give it a label. For this example, we will add it for you.

Question Hotspot

17. You can now style your label text.

Select the **Full Editor button** in the label area.

18. Select the **Label text**.

Left Ventricle

19. For this example, we will make the text bold. Select the **B button**.

B

20. Select the **OK** button.

21. Select the **Feedback text entry box** to add item level-feedback for this selection.

   For this example, we will add it for you.

    Enter Feedback

22. Select the **Next** button.

    Next

23. The Introduction text is shown over the question before the learner starts it. It's a chance to set the scene and provide any instructions the learner should follow. Click in the **text entry area** and we'll add Introduction text for you.
24. Select the **Next** button.

    Next

25.   You can also use Question-level feedback or the Project's default feedback. By default, the Project Feedback is selected. We will use that for this example.

Select the **Done** button to complete your question.

Done

26.   Your question has been added to the stage. Let's have a look at the context tabs for this question type.

Select the **Options** tab.

Options

27.   On the Options tab you can Enable dragging. This shows the labels beside the image and the user drags the label number to the image. We call this Drag Labels.

You can also change the layout of the question. This adjusts where the image and the drag labels are positioned.

In the Settings area, you can set the number of attempts the learner gets to answer the question, choose to show the Feedback or not as well as add a variable.

For this example, we will leave the defaults that are shown.

Select the **FX** tab now.

FX

28. From the FX tab you can set your question to appear with an Entrance Effect, set the direction that the effect occurs as well as add a scrolling effect.

    Note: Scrolling effects allow the question to appear when scrolled into view and exit with an effect when scrolling out of view.

    You can open the Build Your Question modal to edit the content of your question at any time by either double-clicking the question element or by selecting the element and clicking the pencil icon from the element quick tools.
