
Custom Drag and Drop Example 1 - Setting Up Matches

Created On: January 18, 2023

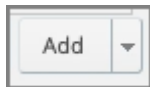

1. Select the **Question** tab.

2. Select **Choices**.

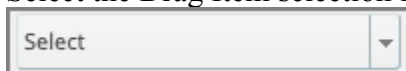

3. The Edit Question Properties panel will open to the right of the Stage.
To set up the first Match, select the Add button.

4. Select **Match**.

5. Select the Drag Item selection list.

6. Select the **Email Phishing Text** element.

7. The Email Phishing Text element is now bound in red on the Stage to show it was selected. Select the **Drop Target** selection list.

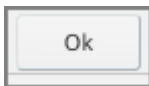

8. Select the **Social Engineering Target** element.

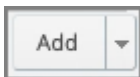

9. The Social Engineering Target element is now bound in red on the Stage to show it was selected.

Select Ok.

10. The first Match is now added to the Choices list at the top of the Properties panel.
To set up the second Match, select the **Add** button.

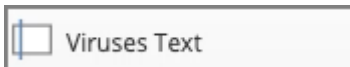

11. Select **Match**.

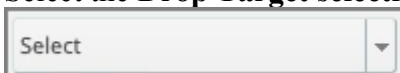

12. Select the **Drag Item selection list**.

13. Select the Viruses Text element.

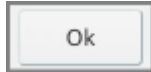

14. Select the **Drop Target selection list**.

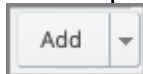

15. Select the **Malware Target** element.

16. Select **Ok**.

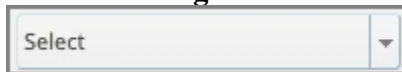

17. To set up the third Match, select the **Add** button.

18. Select **Match**.

19. Select the **Drag Item selection list**.

20. Select the **Spyware Text** element.

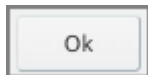

21. Select the **Drop Target selection list**.

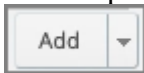

22. Select the **Malware Target** element.

23. Select **Ok**.

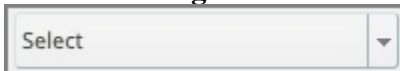

24. To set up the fourth and last Match, select the **Add** button.

25. Select **Match**.

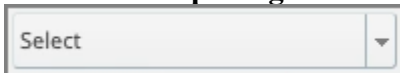

26. Select the **Drag Item** selection list.

27. Select the **Ransomware Text** element.

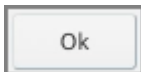

28. Select the **Drop Target** selection list.

29. Select the **Malware Target** element.

30. Select Ok.

31. Now that all the Matches are set up, select **Update** to save your changes.

32. The draggable elements on the Stage now show a hand icon, and the drop target elements show a target icon.
